

Installation tutorial POS

First, you need download the installer for Point of Sale. It's available in the Help section of OfficePos:

After downloading the file setup.exe, run it .Administrator permissions are required to perform the installation correctly. On the next screen click on "Next".

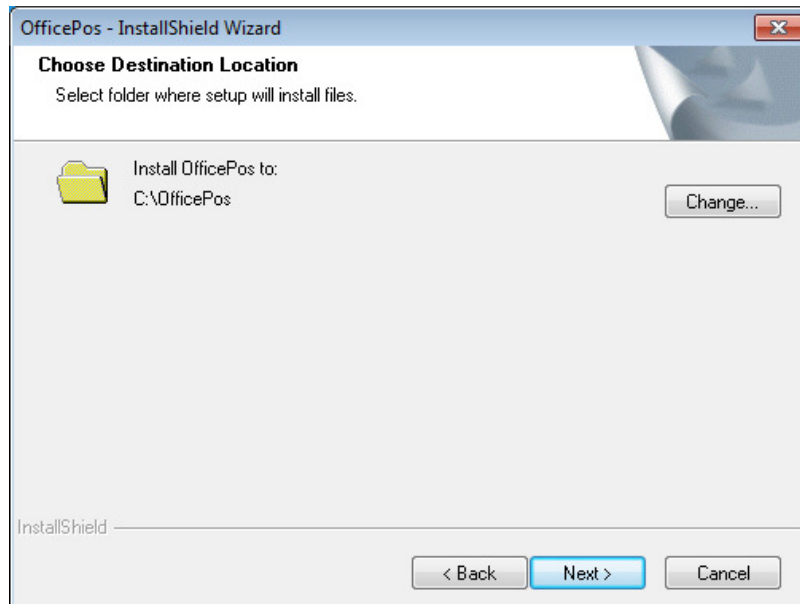

License agreement appears; once read the terms, check "I accept the terms of the license agreement" if accept the terms. Click on "next" to continue the installation. If you do not accept these terms, you may cancel the installation:

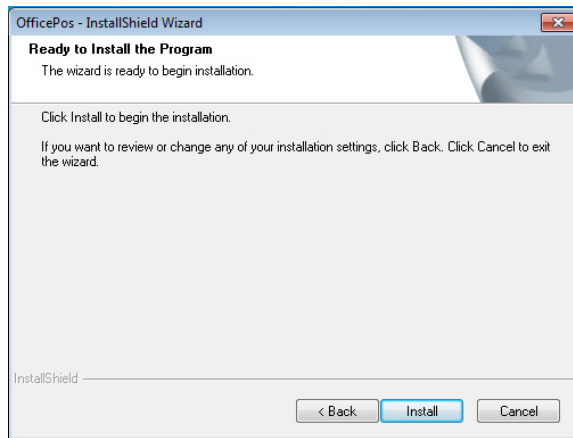

You need to choose a destination folder for the installation, by default, in c:\vge. Press Change, to change the destination. If the destination folder is correct, click on "next":

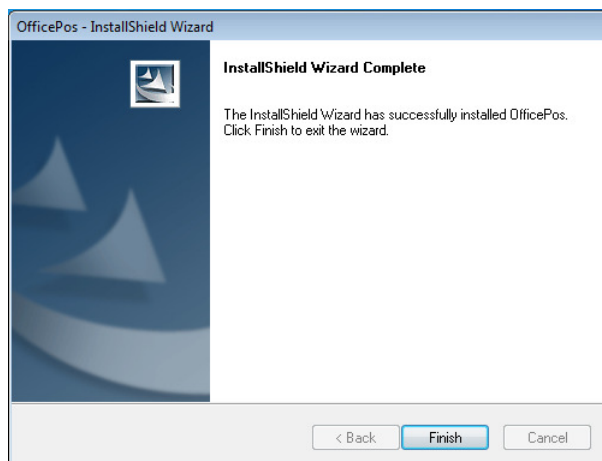

Click on “Install” to continue the installation:

Click on “Finish” to end the installation:

OfficePos will open automatically when the installation finishes:
